

Amendments to the Claims:

Please cancel claims 16-20 without prejudice.

This listing of claims will replace all prior versions, and listings, of claims in the above-captioned application:

Listing of the Claims:

1. (original): An apparatus for cleaning a baseboard of a wall, comprising:
a plurality of pads;
a handle coupled to the pads; and
wherein at least two of the pads comprise front surfaces, and wherein the front surfaces are configured to contact a portion of the baseboard during use.
2. (original): The apparatus of claim 1, further comprising a liquid dispenser, wherein the liquid dispenser is adapted to provide a liquid to at least one of the pads when the liquid dispenser is operated by a user.
3. (original): The apparatus of claim 1, wherein one of the pads comprises a sponge, and wherein another of the pads comprises a dry pad.
4. (original): The apparatus of claim 1, wherein the front surfaces of at least two of the pads are substantially in line with each other.

5. (original): The apparatus of claim 1, wherein the plurality of pads comprises at least one front pad for cleaning a front face of the baseboard and at least one top pad for cleaning a top face of the baseboard.
6. (original): The apparatus of claim 1, wherein the plurality of pads comprises at least one front pad for cleaning a front face of the baseboard and at least one top pad for cleaning a top face of the baseboard, wherein at least one of the top pads is adjustable with respect to at least one of the front pads.
7. (original): The apparatus of claim 1, wherein at least two of the pads are coupled by an interconnecting member, wherein the handle is coupled to the interconnecting member between the two such pads.
8. (original): The apparatus of claim 1, further comprising at least one roller coupled to the pads.
9. (original): The apparatus of claim 1, wherein at least one of the pads is removable, reversible, and washable.
10. (original): The apparatus of claim 1, wherein at least one of the pads comprises a leading portion, wherein the leading portion is adapted to clean an adjoining baseboard when the apparatus is positioned against a baseboard in an interior corner of a room.
11. (original): The apparatus of claim 1, wherein the handle comprises a grip end portion, wherein the grip end portion is angled with respect to an adjoining portion of the handle for the comfort of a user.

12. (original): An apparatus for cleaning a baseboard of a wall, comprising:
a plurality of pads, each pad comprising a front surface;
a handle coupled to the pads;
a liquid dispenser, and
wherein the liquid dispenser is adapted to provide a liquid to at least one of the pads during use.
13. (original): The apparatus of claim 12, wherein at least one of the pads comprises a sponge, wherein another of the pads comprises a dry cloth, and wherein the liquid dispenser is adapted to provide a liquid to the sponge when the liquid dispenser is operated by a user.
14. (original): The apparatus of claim 12, wherein front surfaces of at least two of the pads are substantially in line with each other.
15. (original): The apparatus of claim 12, wherein the liquid dispenser comprises a container, wherein the container is coupled to a pump, and wherein the pump is adapted to pressurize a liquid in the container during use of the liquid dispenser.
- 16-20. (cancelled)
21. (new): The apparatus of claim 6, wherein at least one of the top pads is vertically adjustable.
22. (new): The apparatus of claim 6, wherein at least one of the top pads is horizontally adjustable.
